Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1773

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-3,5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 08-036744 (Hitachi) for the reasons of record.
3. Applicant's arguments filed 10 April 2003 have been fully considered but they are not persuasive with respect to all rejections.

The rejection under 35 USC 102 based upon Chen has been withdrawn in view of the amendment.

Applicants traverse the rejection under 35 USC 103 based upon Hitachi since they assert that Hitachi does not disclose a flexible disk nor one having a hydrogen content in the range presently claimed.

However the examiner points out that Hitachi discloses the use of substrates which may be rigid or flexible [0006] and is directed to solving problems common to both rigid and flexible magnetic disks [0003]. There is no demonstrated criticality in the specification with respect to the effect of rigidity-flexibility of a substrate.

Furthermore, with respect to the hydrogen content Hitachi points out that the mechanical properties of the film may be regulated by the Hydrogen content [0005] which, as the examiner pointed out in the rejection influence the sp²/sp³ ratio and consequently hardness. While applicants have provided many specification examples and comparative examples, these appear to be of a much narrower scope than (and in a few cases inconsistent with) the present claims. If applicants elect to continue

prosecution the examiner suggests a comprehensive explanation of the results and the manner in which they are commensurate with any claims.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

5. This application contains claims 7-21 drawn to an invention nonelected with traverse in Paper No. 4. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stevan A. Resan whose telephone number is (703) 308-4287. The examiner can normally be reached on Tues-Fri from 7:30AM to 6:00PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Thibodeau, can be reached on (703) 308-2367.
